Our Real World Fuel Economy Results

For more than 12 months, Maxim Truck & Trailer has had 50 customer fleets with the S13 engine and powertrain on the road and, testing them in real world conditions.

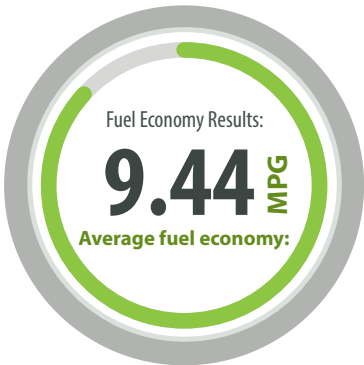

These are the results.

More than 50 different fleets in Manitoba, Saskatchewan and Northwestern Ontario have taken part in these trials

Our demo S13 units have travelled over 900,000 Kms in east/west and north/south routes hauling a variety of freight.

Potential Savings After 100,000 Miles

Engine	Fuel Used to Travel 100,000 Miles	Fuel Cost	MPG
International S13	10,471 Gallons	\$78,533	9.44
Competitor Scenario	11,686 Gallons	\$87,720	8.44
Yearly Savings	- 1,225 Gallons	- \$9,187	+1 MPG

The table above was made with the assumption that the trucks travel 100,000 miles/year (160,934 kms). Diesel cost \$7.50 per imperial gallon (1.65 /Liter) at the time of this test, and it shows the savings of one extra MPG.
