Introducing Fountain Tire’s New Digital Vehicle Report

The Digital Vehicle Report is our commitment to absolute transparency. That’s what it means to be on this road together.

• Helps you manage costs by only investing in necessary repairs
• Allows you to forecast for future expenses
• Provides insights on the health of your overall fleet to avoid costly breakdowns
• Helps improve clarity and transparency
• Provides visual records
• The results are emailed or texted to you

The report uses a green, yellow, and red colour coding system so you and your team understand the different findings in the report.

Green generally indicates that everything is ok, while yellow and red often indicate that there may be an issue with that particular part.

To see how the Digital Vehicle Report can work for you, email: corporate.sales@fountaintire.com

A SMARTER WAY TO MANAGE FLEET MAINTENANCE COSTS

With Fountain Tire’s Digital Vehicle Report, we don’t just tell you what’s going on with your fleet, we show you. Our technicians take photos and videos of your vehicles to help you understand what needs attention now, what doesn’t, and why.

New & Newsworthy

Canadian Used Truck Prices on the Rise: Ritchie Bros.
On March 8, 2021, Today's Trucking reported that Canadian equipment prices are on the rise according to the latest Used Equipment Market Trends report from Ritchie Bros. Canada’s used truck tractor prices were up for the three months ending in February, when compared to the same period last year. In December 2020, watchlists for truck tractors in upcoming events was three times that of December 2019. Ritchie Bros. also saw record volume and pricing for flatbed trucks, van trucks, and van trailers – all of which are tied to the ‘last mile transport’ trend which grew exponentially last year. With used prices rising and new inventory in short supply, check out all of Maxim’s available new and used inventory online at maximinc.com.
