

SERVICE PROGRAMS

S E R V I C E P R O G R A M S

ON-SITE MAINTENANCE

You benefit from on-site service without the hassle of hiring, managing or training of Technicians.

FACTORY TRAINED HEAVY DUTY TECHNICIANS

Our Master Technician work force continues to grow as we build and invest in the largest, most advanced team of heavy duty technicians in Canada.

PREVENTIVE MAINTENANCE PROGRAMS

Service work is one of our core competencies. Many of our customers choose to outsource their maintenance to us so they can focus on their core competency.

MACHINE SHOP SERVICES

Our machine shop equipment and services offer custom machining, thread cutting and boring, gears and sprockets, keys and keyways as well as custom fabrication.

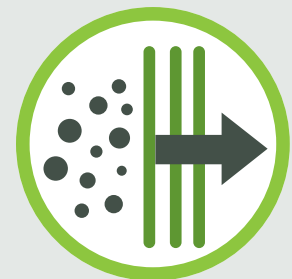

MOBILE SERVICE

We will bring advanced preventative maintenance capabilities directly to you in Preventative Maintenance Trucks. Minimize downtime, save on fuel and labor by allowing your drivers to focus on their customers instead of shuttling equipment back and forth.

FLUID SAMPLING AND ANALYSIS

Monitor contaminants, identify possible sources, provide early warning signs to potential catastrophic failures, reduce unscheduled downtime, optimize oil drain intervals and support Warranty claims to enhance recovery.

FULL SUITE OF DPF CLEANING SOLUTIONS

Minimize downtime, air pollution and fuel costs while extending the efficiencies of both engines and drivers. Whether your DPF requires inspecting, testing, single or multi-stage thermal and pneumatic cleaning, repair or replacement, we offer many DPF solutions.

TELEMATICS & REMOTE DIAGNOSTICS

Our Service Department makes use of leading edge telematics and GPS technology to help our customers keep their fleets operating at peak efficiency.

REEFER SERVICE & REPAIR

We provide service and repairs to all makes and models of reefer units including diagnosing and coordinating warranty repairs on major reefer brands.

COLLISION & BODY SHOP

Our services include Bodywork, Painting, Framework & Front-End Alignment, Rebuilding and Body Integrity Inspections.

WARRANTY REPAIRS

Our Service Shops are authorized to complete warranty diagnostics and repairs on heavy duty engines that include International, Cummins and Caterpillar.

CAB & BUNK CLIMATE SOLUTIONS

We offer the supply and installation of a variety of the industry's most trusted cab and bunk climate solution providers.

WELDING & FABRICATION

We employ ticketed welders to repair and fabricate metal components on heavy duty trucks and trailers.

LIFTGATE INSTALLATION, SERVICE & REPAIR

We supply, install and service hydraulic power tail and rail lift gates on both trucks and trailers. Single or double cylinder, power up or down, conventional, column, cantilever or stowaway, we can meet your needs.

WET KIT INSTALLATION & REPAIR

Whether it be a single, double or triple gear power take-off with two-line, three-line integral or non-integrated hydraulics, we can assist with all types of truck or trailer mounted hydraulic systems regardless of application.

NO IDLE SOLUTIONS

With new emissions engines, excessive idling is detrimental so we provide our customers with no idle solutions that heat and circulate engine fluids when your vehicle is not operating.
